

What went well?

What should we keep doing?
What should we celebrate?
Where did we make progress?

What went poorly?

Where did we have problems?
What was frustrating to us or others?
What held us back?

POLITICS

It helps develop an understanding of politics

The traditional approach in studying political science has several drawback

It also studies factors such as environmental

A better educated and informet electorate presumably produces a better government

Lack of interdisciplinary approach

The traditional approach focuses solely on political science and does not take into account the contributions of other disciplines

Each ideology contains certain ideas on what it considers to be the best form of government

The same word is sometimes used to identify both an ideology and one of its main ideas.

The qualities of effective leadership include courage, strength, the ability to communicate effectively, knowledge, judgment, integrity, and interpersonal skill

Among modern political theorists, there are three contending conceptions of democracy: aggregative, deliberative, and radical.

Students will **learn about social and political theories and how these theories relate to current issues.**

There will be lots of classroom discussion, debate and reflection on the different ideas and perspectives.

What ideas do you have?

What ideas do you have for future work together?
Where do you see opportunities to improve?
What has untapped potential?

How should we take action?

What do you believe we should do next?
What specific things should we change?
What should extend beyond this meeting?
